DOCUMENTS DEPARTMENT
INTRODUCTION

The Bay Area '70 Census Series is a localized presentation of statistics from the "fourth count" census data initially gathered by the U.S. Bureau of the Census on April 1, 1970. Data presented in this report cover the nine counties, incorporated cities and unincorporated areas of the San Francisco Bay Region--including employed population by occupation and industry, county of employment, means of transportation to work, labor force status and unemployment rates. Percentage distributions within several categories are included.

There are two additional reports presenting other valuable data in The Bay Area '70 Census Series. Report #1 includes the basic population count, growth rates, age, sex, race, marital status and housing information. Report #2 includes family income, income by males and females, educational attainment, school enrollment by age, population by residence in 1965 and year moved into housing unit. Percentage distributions within several categories are also included. These reports are available from the Council's office.

The Bay Area Council is pleased to have been able to undertake this project. We acknowledge the computer service and technical advice of Dr. David Bradwell, David Bradwell and Associates, and the assistance of John Royce, Pacific Telephone and Telegraph Company, in the preparation of this data for publication.

We hope that this data series proves of interest and assistance to you.

Sincerely,

Angelo J. Siracusa
Executive Director
